Core Skills

Frontend

- React
- NextJS
- JavaScript
- TypeScript
- Jotai
- Redux
- ShadCN
- Tailwind
- Styled Components
- CSS, SCSS
- HTML

Backend

- NodeJS
- REST APIs
- GraphQL
- SQL
- NoSQL
- Supabase
- Contentful CMS

Architecture

- System design
- Data modelling
- Caching strategies
- API design

AI Engineering

- AI-Driven Development
- Copilot
- Claude
- Agentic workflows
- LLM integration

Profile

Front-end-focused full stack engineer with 8+ years' experience working in cross-functional teams to deliver clean, robust and performance optimised web applications that drive measurable impact. Specialises in building production-grade solutions using React and NextJS, comfortable translating product and client requirements into structured technical implementations with strong systems thinking across the stack. Experienced in AI-assisted development workflows to accelerate delivery while maintaining high software engineering standards and maintainability. Seeking to contribute to high-growth environments, solving meaningful product and technical challenges.

Experience

Founder & Full Stack Engineer

Aug 2024 - Present

Crust Central | *London (Remote)*

crustcentral.com

- Independently designed and built a production-grade progressive web application end-to-end, from initial concept through architecture, development, and deployment
- Translated product vision into a structured technical implementation, defining architecture, data models, and system boundaries
- Evaluated and integrated optimal technologies and third-party services, analysing trade-offs between performance, scalability, cost efficiency and developer experience
- Built a scalable full stack system including:
 - React / NextJS front-end with streaming SSR and RSC's
 - Relational PostgreSQL + PostGIS schema for efficient geospatial querying
 - Secure API layer with JWT authentication, row-level security and rate limiting
 - OAuth and role-based user access control
 - Local-first architecture using IndexedDB (Dexie) with background sync
 - Atomic state management (Jotai) and service workers (Serwist) for caching and offline capability
 - Hardware-accelerated map rendering using WebGL (MapLibre, DeckGL)
 - Optimised media pipeline with Cloudinary (image processing, watermarking, CDN delivery)
 - LLM-based image analysis (Gemini) for automated tagging and metadata enrichment
 - Standalone microservice for video preview generation and upload to Cloudflare
- Owned CI/CD pipelines, deployment strategy, automated database backup and production monitoring
- Analysed and improved performance using Chrome DevTools and Lighthouse
- Leveraged AI-assisted development tools (Copilot, Claude) to accelerate feature delivery
- Iterated rapidly based on user feedback, balancing shipping speed with system stability

Career Break

Sept 2022 - Aug 2024

- Career break to go travelling, extended due to family care and estate executor duties

Senior Front End Engineer

July 2019 - Sept 2022

Shelter | *London (Remote)*

- Replatformed Shelter's website as part of a cross-functional Agile team, delivering significant performance and accessibility improvements to 7 million annual visitors
- Championed accessibility compliance, including the introduction of team accessibility

Testing

- Jest, Vitest
- Playwright, Cypress

Infrastructure

- CI/CD
- Github Actions
- CDNs
- Edge Functions
- Vercel, Netlify

Other

- A11y (WCAG)
- SEO
- Responsive UI
- UX Principles
- Performance

Education

University of Southampton, 2008-2011

Information Technology in
Organisations, BSc.
First Class with Honours

Reigate Grammar School, 2008

A Levels: A, A, B
GCSE's: 3A*, 5A, 2B

References

Available upon request

guidelines and automated accessibility testing tools

- Actively contributed to team technical discussions, analysed team processes and implemented strategies for improved workflows
- Collaborated with UX and design teams to co-develop a reusable component library improving efficiency, consistency and accessibility compliance across the organisation
- Owned end-to-end project delivery, writing clean, modular, unit-tested code
- Upheld team coding standards and codebase maintainability through code reviews and documentation
- Line managed and mentored junior team members, accelerating growth and career progression through pair programming sessions and regular 1:1 meetings

Associate Web Engineer

May 2017 - July 2019

ASOS | *London*

- Collaborated within a fast-paced, scale-up environment as part of a cross-functional Agile team to replatform the ASOS website, implementing a scalable micro-frontends architecture to deliver performance and scalability improvements for 20 million active users
- Worked closely with the UX and design teams, who provided data-driven user insights, to deliver polished, user-centric UI features
- Followed TDD practices to deliver clean, modular, unit-tested code and upheld team coding standards and codebase maintainability through regular code reviews
- Actively contributed to Agile ceremonies and team technical discussions, analysing team processes and refining stories and acceptance criteria to improve delivery
- Mentored junior team members through regular pair programming sessions, contributing directly to a junior developer being promoted

Consultant Front End Engineer

Sept 2015 - Feb 2017

BAE Systems | *London*

- Delivered front-end expertise across multiple external client projects, including greenfield web applications for Vodafone and the Royal Navy and legacy codebase maintenance and improvements for Three Mobile and the Home Office
- Communicated clearly and effectively to explain complex concepts to non-technical stakeholders and translate client needs into technical specifications
- Took end-to-end ownership of a data visualisation project, including comprehensive documentation and stakeholder training, enabling rollout across 20 international markets

Front End Engineer

June 2013 - Sept 2014

First Utility | *London*

- Worked in a cross-functional Agile team to rebuild the First Utility website following a redesign to deliver significantly improved usability and cross device compatibility to users, winning the 2014 Utilities Website of the Year award
- Converted wireframes into fully responsive web pages and took ownership of data visualisation projects

Junior Front End Engineer

Sept 2012 - May 2013

MyDeco | *London*

- Delivered clean, modular front-ends within a fast-paced start-up environment
