- SEO best practices
- Responsive UI
- UX principles
- REST APIs
- GraphQL
- Gatsby
- SQL/ PostgreSQL
- NoSQL
- Supabase

Profile

Front-end-focused full stack engineer with 8+ years experience delivering high-performance web applications across scale-ups and non-profit organisations. Specialises in building scalable, maintainable front-end architectures, with a strong emphasis on performance, accessibility, and clean code. Proven track record of collaborating with cross-functional teams to ship features that drive measurable impact. Seeking to contribute to high-growth environments, solving meaningful product and technical challenges.

Experience

Founder & Developer

Crust Central | *London (Remote)*

Aug 2024 - Present

crustcentral.com

- Independently completed the full software development lifecycle, from design to deployment, of a performance-optimised hybrid web application for the global skateboarding community, enabling users to discover and share the rugged terrain of skate spots - commonly known as “crust” amongst the community
- Researched, evaluated and selected optimal technologies, analysing trade-offs between performance, scalability, cost efficiency and developer experience
- Architected a scalable front-end, implementing advanced state management, data fetching, lazy loading and a local-first caching strategy, alongside optimised image assets and WebGL integration
- Engineered the back-end architecture, including relational database schema, RESTful API endpoints, role-based user authentication, data fetching and caching layers to deliver fast, secure and scalable application performance
- Configured CI/CD pipelines and automated database backups using GitHub Actions
- Implemented cloud hosting and CDN solutions to ensure efficient and scalable delivery
- Leveraged AI development tools to accelerate productivity and integrated LLMs on the front-end to enhance user experience
- Drove continuous product improvement through iterative development cycles informed by user feedback and market research

Career Break

Sept 2022 - Aug 2024

- Career break to go travelling, extended due to family care and estate executor duties

Senior Front End Engineer

Shelter | *London (Remote)*

July 2019 - Sept 2022

- Replatformed Shelter’s website as part of a cross-functional Agile team, delivering significant performance and accessibility improvements to 7 million annual visitors
- Championed accessibility compliance, including the introduction of team accessibility guidelines and automated accessibility testing tools
- Actively contributed to team technical discussions, analysed team processes and implemented strategies for improved workflows
- Collaborated with UX and design teams to co-develop a reusable component library improving efficiency, consistency and accessibility compliance across the organisation
- Owned end-to-end project delivery, writing clean, modular, unit-tested code
- Upheld team coding standards and codebase maintainability through code reviews and documentation

- Contentful CMS
- ShadCN / Radix
- MapLibre/ Mapbox
- React Query
- React Hook Form
- Zod
- Data Visualisation (D3.js)
- WebGL (DeckGL, PixiJS)
- IndexedDB (DexieJS)
- Service Workers (Serwist)
- Storybook
- Lighthouse
- Posthog
- CI/CD
- Github Actions
- Cloudinary CDN
- Cloudflare
- Google Cloud, Netlify

Education

University of Southampton, 2008-2011

Information Technology in
Organisations, BSc.
First Class with Honours

Reigate Grammar School, 2008

A Levels: A, A, B
GCSE's: 3A*, 5A, 2B

References

Available upon request

- Line managed and mentored junior team members, accelerating growth and career progression through pair programming sessions and regular 1:1 meetings

Associate Web Engineer

May 2017 - July 2019

ASOS | *London*

- Collaborated within a fast-paced, scale-up environment as part of a cross-functional Agile team to replatform the ASOS website, implementing a scalable micro-frontends architecture to deliver performance and scalability improvements for 20 million active users
- Worked closely with the UX and design teams, who provided data-driven user insights, to deliver polished, user-centric UI features
- Followed TDD practices to deliver clean, modular, unit-tested code and upheld team coding standards and codebase maintainability through regular code reviews
- Actively contributed to Agile ceremonies and team technical discussions, analysing team processes and refining stories and acceptance criteria to improve delivery
- Mentored junior team members through regular pair programming sessions, contributing directly to a junior developer being promoted

Consultant Front End Engineer

Sept 2015 - Feb 2017

BAE Systems | *London*

- Delivered front-end expertise across multiple external client projects, including greenfield web applications and legacy codebase maintenance and improvements
- Communicated clearly and effectively to explain complex concepts to non-technical stakeholders and translate client needs into technical specifications
- Took end-to-end ownership of a data visualisation project, including comprehensive documentation and stakeholder training, enabling rollout across 20 international markets

Front End Engineer

June 2013 - Sept 2014

First Utility | *London*

- Worked in a cross-functional Agile team to rebuild the First Utility website following a redesign to deliver significantly improved usability and cross device compatibility to users, winning the 2014 Utilities Website of the Year award
- Converted wireframes into fully responsive web pages and took ownership of data visualisation projects

Junior Front End Engineer

Sept 2012 - May 2013

MyDeco | *London*

- Delivered clean, modular front-ends within a fast-paced start-up environment

Junior Full Stack Engineer

Sept 2011 - Sept 2012

OpenBet | *London*

- Worked as part of a cross-functional team to develop features and resolve bugs across the full stack
